1. The following is an examiner's statement of reasons for allowance:

The invention is directed to printing using a plurality of output apparatus.

Claim 24 identifies the uniquely distinct features of "confirming whether the staple-printing is set in a print job; confirming whether high-speed printing is set in the print job, if staple printing is set; assigning all page images to one of the output apparatus in order to carry out the staple-printing, if the high-speed printing is not set; canceling the staple-printing if the high-speed printing is set, and distributing image outputs to one or more of the output apparatuses which are in a printable state."

Barry et al (US 5,596,416), teaches a similar method of high speed printing of using a plurality of output apparatus, either singularly or in combination with cited references, fail to anticipate or render the above underline limitations obvious (to use in combination with other claimed limitations).

Claims 22, and 29 has similar features of claim 24; therefore, claims 22 and 29 are allowed based on the same reason given to claim 24

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
